About Us

For about 30 years, Invento is synonymous with imaginative fun and leisure activities, for a liveable world, for young and old, indoors and outdoors. As an antipole to an increasingly hectic everyday life, people today are looking for leisure activities that focus on fun, relaxation and deceleration. Invento is prepared for these expectations and shapes the leisure time of young and old in many ways and with an exceptional product range. Kites, windspinners, toys - the Invento range includes exceptional, innovative and high-quality products that have a touch of something special. With our products, we improve people's well-being to better meet the ever-increasing challenges of everyday life.

„HQ“ - Created For Fun, Engineered To Last:

With our „HQ“ umbrella brand, we hold a leading position worldwide in the markets for Kites and Windspinners. Due to high quality standards, good customer service, a versatile product range and the development of products by our own German team, Invento differs from its competitors and creates a lasting confidence in the performance of our products.

Toys - „Invento just play“ and brands from all over the world:

Our own toy ranges under the umbrella brand „Invento just play“ stand for extraordinary playing experiences and high quality standards. With a passion for products beyond the ordinary, we complement our own product lines with a variety of well-known brands from all around the world. Let us take you on a discovery trip through our exciting catalogues.

WOODEN CITY

Wood Trick[®]
A NEW WORLD OF ART

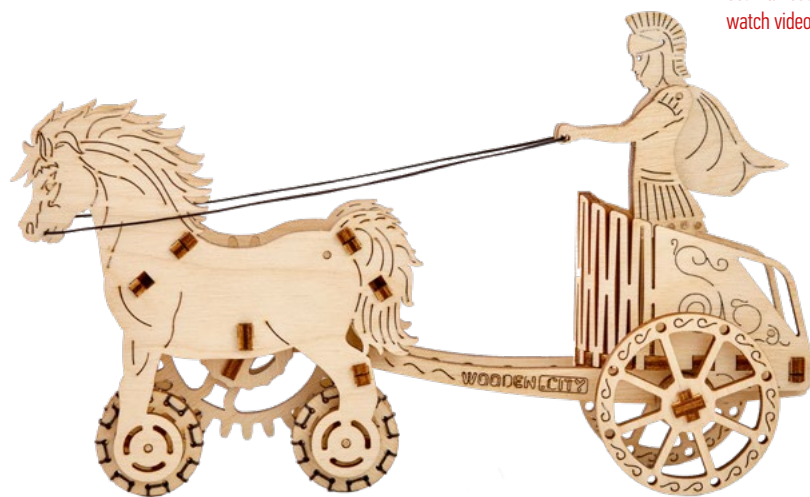

Wooden City + Wood Trick – the unique wooden mechanical models:

- ▶ Natural materials – all 3D model kits made from sustainably sourced birch plywood
- ▶ Assembly of sets does not require any glue or tools
- ▶ Mechanical functions – all models produce motion (self-propulsion or other functions)
- ▶ Moving parts are sturdily constructed (e.g. stable and solid axes) and different from competitors
- ▶ Unique 3D wooden models provide a variety of functions and work without any electronic components
- ▶ Easy assembly – ready-to-assemble parts are laser-cut
- ▶ Attractive packagings (e.g. wooden boxes with Wooden City items)
- ▶ Made in Europe
- ▶ Unique designs make all 3D wooden models popular collection models
- ▶ All functional models are not children's toys
- ▶ Age: 14+

Roman Chariot

This WOODEN CITY 3D model kit is a copy of a war chariot employed and operated by Roman warriors in ancient times. Assemble this historically accurate model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the chariot with the trigger lever. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Roman Chariot is a perfect model for beginners. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 69

Assembly time: 2 hours

Model size: 22 x 5.5 x 13 cm

Packaging size: H17.5 x W24 x D2.8 cm

Art. Nr. 502322

MOQ	CP	MC	
1	1	26	5 906874 128008

Chariot Da Vinci

Da Vinci scythed chariot is an ancient war chariot with scythe blades mounted on each side. The blades extended horizontally to each side of the wheels. Theoretically the scythed chariot would plow through infantry lines cutting combatants in half or at least opening gaps in the line which could be exploited. This historically accurate WOODEN CITY 3D model kit with a rubber band engine was created to show you the amazing world of ancient mechanics. Assemble this historically accurate model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the chariot with the trigger lever. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Da Vinci Chariot is a perfect model for beginners. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 74

Assembly time: 2 hours

Model size: 23 x 10.7 x 10.4 cm

Packaging size: H17.5 x W24 x D2.8 cm

Kinetic Picture

What at first glance looks like a clock is in reality the model of a Kinetic Picture. Assemble this unusual moving picture with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Kinetic Picture with the trigger lever - the optical illusion will capture your imagination. Observe the whole rotation process when the Kinetic Picture triggers off the gears. Adjust the tightness of the rubber band and speed of rotation of the mechanism with the trigger lever. A hook is attached to hang the picture on a wall. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Kinetic Picture is a real fun for those who appreciate beauty and love science. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools
Number of parts: 185
Assembly time: 6 hours
Model size: 34.4 x 22.4 x 6.2 cm
Packaging size: H24 x W35.5 x D4 cm

Art. Nr. 502332

MOQ 1	CP 1	MC 9	5 906874 128077
----------	---------	---------	-----------------

Safe

This model of Wooden City is a real safe with combination lock - it can be opened with a secret number combination of 3 digits. The code can be changed at any time. If the code has been forgotten, the safe can be opened with a secret function (this method is described in the manual). If the combination was correct, the safe opens automatically when the third digit is entered. To lock the safe again, just close the door and turn the knob - the safe locks itself. The safe is the perfect model for hiding banknotes or other valuables. With handle for easy transport. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools
Number of parts: 202
Assembly time: 4 hours
Model size: B15 x H15 x T15 cm
Packaging size: W3.5 x H24 x D4 cm

Ferris Wheel

This WOODEN CITY 3D model kit of a Ferris Wheel is an original interpretation of the well-known amusement park attraction and a tribute to the engineers who realised our dreams to see the world from a bird's eye view. The Ferris Wheel model can boast nice bonus features – a secret casket and a small coin box. Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Ferris Wheel with the trigger lever. The operating time is 2 minutes. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Ferris Wheel is a project of advanced level of difficulty. It will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 429

Assembly time: 8 hours

Model size: 22 x 26 x 32.2 cm

Packaging size: H24 x W35.5 x D5.1 cm

Windmill

Green meadows, birds in the blue sky, and a windmill – windmills have shaped European landscapes for centuries. As soon as you open the wooden box this mechanical model will take your imagination. The Windmill model can boast a nice bonus feature – a small coin box at the bottom of the patterned stand. Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Windmill with the trigger lever. Observe the whole rotation process when the Windmill triggers off the gears, among which there is a flywheel, and a real planet gear. On the left there is a trigger lever to stop movement of the Windmill. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Windmill is a project of advanced level of difficulty. It will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Express Train + Rails

The Wooden City locomotive is a mechanical masterpiece reminiscent of the steam wheels of bygone times. The model is powered by a rubber motor and gears, but all other functions (e.g., pistons, valves, cylinders, connecting rods, drive rods) are very close to those of a real steam locomotive. A detailed cabin, the boiler cladding and functioning doors and flaps make the steam locomotive a fascinating model in the Wooden City range. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 384

Assembly time: 7-8 hours

Model size: W35 x H12.2 x D11 cm

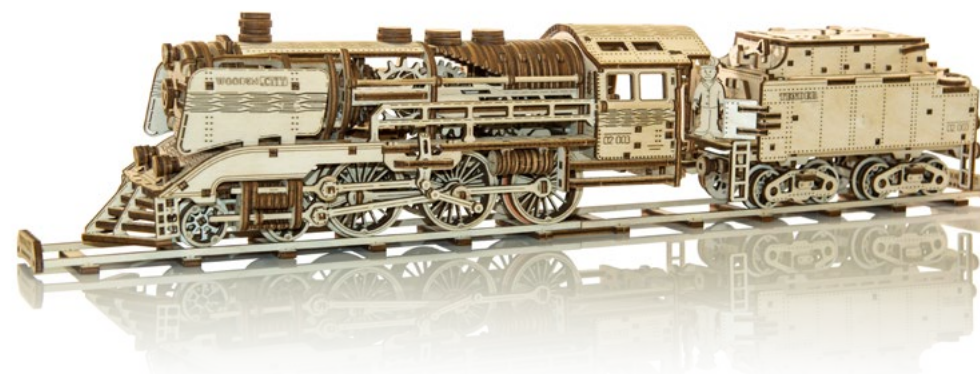

Packaging size: W35.5 x H24 x D4 cm

Jeep 4x4

Today the "Jeep" is a synonym for an expensive off-road vehicle. During WWII, the American company Willys started production of the Willys MB automobile. It went down in history as a reliable, manoeuvrable and functional vehicle. It was a "technical breakthrough". There was a real "war of engines". Overcoming of obstacles, road dust and risk - you have a real adventure in your hands! Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Jeep. After assembly, you need to set the position of the lever forward or backward, set the locking lever in the stop position, start the model with the key and lower the lever (the key is located in the spare wheel). The front wheels are steered. Open and fix the hood by two locks and tilt the windshield. The Jeep can boast further exciting features - four-wheel drive transmission, independent suspension on both axles, internal combustion engine with moving pistons, 3 moving pedals (which are resiliently pressed with an additional rubber band), rear-view mirror, removable shovel, axe and canister. The Jeep runs up to 4 meters and is a real find for those who are fond of history and adventure. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Jeep will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 564

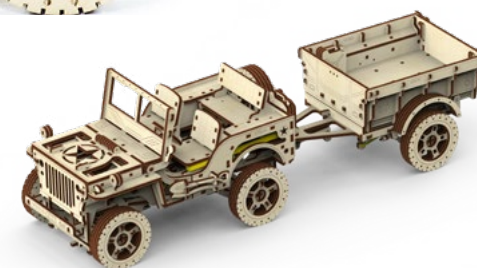

Assembly time: 12 hours

Model size: 17.9 x 15.1 x 14.8 cm

Trailer

Now complete your Wooden City Jeep 4x4 with the detailed military trailer. The trailer is provided with a suspended axle. A special lever makes it possible to tilt the loading area, the rear loading flap can also be opened. A removable reserve canister as an accessory gives the trailer that last little touch. The trailer has a clutch and can be easily connected to the Jeep 4x4.

London Bus

Have you ever been to London before? Are you a 3D puzzle geek like us? Plunge into the vibrant London atmosphere by building our new WOODEN CITY 3D mechanical model – the famous London double-decker! Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the London Bus. There are two trigger levers installed in this London Bus model to operate the speed level (speed control trigger) and the bus driving direction (direction control trigger). Listen to the engine sounds that we meticulously crafted in the manufacturing process to provide a more realistic driving experience. The London Bus rubber band engine operates in 2 speeds and is the most powerful on the market – the London Bus runs up to 4 meters. But that's not all! The London Bus has three passengers whose safety will be in your hands. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The London Bus will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wood Trick: Tractor

Universal tilling tractor is one of the most high-performance models of Wood Trick construction sets. To appreciate this mechanism, you have to be a real man. Engine operation is fascinating – having opened the bonnet, you can see the piston movement. Tractor may operate at neutral speed or at full speed – then you see how quickly it drives.

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 401

FRANZIS

Learn more about electronics. FRANZIS Electronic Kits are the best way to tap into the exciting world of electronics. The unique FRANZIS Kits provide hours of fun for everyone from beginners to professionals. Each FRANZIS Kit comes complete with all necessary components and detailed assembly instructions:

- ▶ All electronics kits have been developed by experts – refined to maximise functionality and didactics
- ▶ By quickly experiencing success electronics enthusiasts gain greater confidence in their own technical abilities
- ▶ FRANZIS supplies „Quality Time“ for the whole family – time to play, explore and discover
- ▶ Designed to give children and adults an understanding of technology through playful experiments
- ▶ Many FRANZIS kits are unique and often without equal
- ▶ FRANZIS provides endconsumer support with „Lifetime“ guarantee
- ▶ All items come in attractive gift boxes

Voice Changer Kit

For your next undercover mission! With this technological gadget, your own voice is guaranteed to remain unrecognizable. The voice changer modifies the frequencies of the voice so that even your best friends will not recognize it. Ideal tool for remaining „undercover“ or playing a prank!. Box Contents: Assembled board, battery clip, knob, ring nut, speaker, manual, jewelry poster. Additionally required: 9 V block battery. Without soldering. Age: 14+

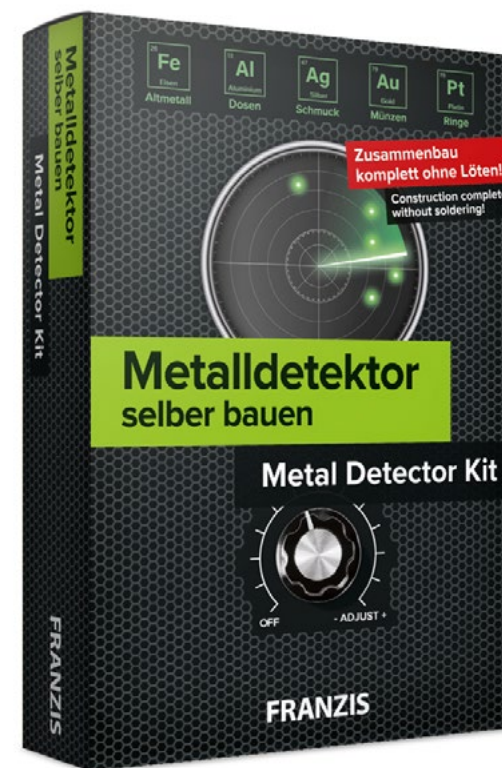

Art. Nr. 504155			NEW!
MOQ 1	CP 1	MC 56	4 019631 670595

Spy Microphone

Always listening! With this kit, you can easily build a powerful listening device that cannot even be obstructed by walls. The manual clearly guides you through the assembly. No previous experience is required. Ideally suited for all hobby investigators and tinkerers interested in technology. Box Contents: Assembled board, battery clip, knob, ring nut, jewelry poster, instructions. Additionally required: 9 V block battery, headset with 3.5 mm jack plug. Without soldering! Age: 14+

Franzis Synthesizer Construction Kit

Do you remember Axel F., the Beverly Hills Cop soundtrack, A-Ha's Take on Me or the songs by the German band Kraftwerk? This retro modern, the mini keyboard of the 80s, allows you to revive the music in modern style. That's how to make music: Build your own synthesizer! Gilded touch keys serve as a keyboard for making music. With the completed synthesizer, you can generate classical sounds as well as futuristic music. Two push-buttons let you easily change between two octaves, tempered whole tones and semi-tones. Simply touch the keys with your finger to produce the desired notes. Use sound effects to craft your music individually. LEDs visualize the selected settings. Of course, the Franzis synthesizer also comes with a volume control. The kit comprises all required components. Even with low mechanical skills, you can build the synthesizer swiftly and easily. The detailed instructions describe the assembly step by step. Only a few components have to be soldered to the pre-assembled circuit board. Additionally required: Soldering iron, solder, wire cutter. To operate the device, 3 x 1.5 V batteries (AA) are required. Age: 14+

Franzis BMW R 90 S Flat-Twin Engine

Build your own classic, working BMW flat-twin engine model. The BMW R 90 S was one of the motorcycle icons of the 1970s. When it came on the market in 1973 it was one of the fastest series production motorcycles of its time and the top-of-the-range model of the „/6“ type series made by the Bavarian motorcycle manufacturer. With this 200-part-kit you can enjoy a transparent functional model of the two-cylinder flat engine of the legendary BMW R 90 S which fascinates its numerous fans worldwide. A special highlight of the model kit is its true-to-detail five-speed gearbox. Build your own classic, working BMW flat-twin engine model in about 3 hours: transparent working model, shiftable five-speed gearbox, original motorsound. All parts of the model kit move exactly like the original does. The components are easy to stick and screw together - without any adhesive. The high-quality manual offers lots of both fun and knowledge. Learn about the history of BMW motorcycles and understand the successful concept of the flat-twin engine. Numerous illustrations provide a deep insight into the fascinating world of the BMW „superbike“ R 90 S. Including detailed step-by-step construction manual. Additionally required: 3 x 1.5 V batteries (AA). Age: 14+

Franzis Porsche Carrera Racing Engine Construction Kit

Build your own classic Type 547 4-cylinder boxer model! The myth of the Carrera engine! To this day, the model 547 Porsche racing engine is considered to be unique in the world of racing. This technical masterpiece was one of the reasons for the numerous Porsche racing victories in such legendary vehicles as the 356 or the 550 Spyder. With this pack, you can experience the model 547 engine masterpiece and build a transparent working model of the flat-4 horizontally opposed engine. Using the more than 300 parts you can build a detailed transparent engine model, with all parts moving like in the big model: crankshaft, pistons, valves. Including original motor sound. The components are easy to stick and screw together – without any adhesive. Model size: 27,5 x 28,5 x 28 cm. The high-quality companion book offers comprehensive information on Porsche, the early days of racing at the Zuffenhausen sports car makers as well as the Porsche engine 547. Additionally required: 3 x 1.5V batteries (AA). Age: 14+

Franzis Porsche Flat-Six Boxer Engine Construction Kit

Build your own classic Porsche 911 engine model and watch its operation through the transparent cylinders to learn how a flat 6 engine with its horizontally opposed cylinders works – model scale 1:4. The Porsche flat-six boxer engine and the cars it powers are legendary. With this kit, you can assemble a model of a 1966 2 litre flat-six engine in around three hours. Discover the fascinating world of automotive engineering with the whole family! Build a transparent engine replica using 290 parts. All essential engine parts move authentically: crankshaft, pistons, valves. No glue needed – all components are easy to assemble and screw together. A comprehensive manual provides plenty of information on and fun facts about Porsche and the 911. The development of the iconic design and the corresponding technical concepts are clearly explained. Awaken your inner engineer and get started! The detailed step-by-step instructions help you build your own Porsche flat-six boxer engine for your workshop, office desk or living room. The finished engine is mounted on a display stand and features a sound module with the original boxer sounds. Additionally required: 3 x 1.5 V batteries (AA). Age: 14+

Franzis Ford Mustang V8 Engine

A star is born! Series production of the first generation of the Ford Mustang began in 1964. Since then, the "Pony Car" has become the epitome of the American sports car. What made this legendary automobile with its emblematic running horse on the radiator grille so distinctively charming was its sporty image combined with high-performing, reliable technology under the hood. Build a transparent, functional model of the formidable V8 engine from the 1965 Ford Mustang. The enhanced 289 K-Code V8 High Performance engine produced a captivating 271 HP at 6,000 revolutions per minute, and a maximum torque of 321 lb-ft (423 Newton meters) at 3,400 rpm. The assembly kit uses a scale of around 1:3 and contains approximately 200 individual pieces. In two to three hours, you'll build a finely detailed, transparent Ford Mustang 289 K-Code V8 model engine with original motor sound. All of the model parts move exactly as they do on the original, life-size model. The components fit together easily, either as interlocking pieces or with screws – no glue required. The Ford Mustang kit comes with an exclusive 100-page booklet, complete with top-notch details and numerous stunning illustrations that guide you through the history of the Ford Mustang while outlining the technology that lies under the hood. The handbook contains a detailed and generously illustrated step-by-step guide that will lead you through the construction of the engine kit with clear instructions. Additionally required: 3 x 1.5V batteries (AA). Age: 14+

► Brainstorm Projector Torches

Brainstorm Projector Torches bring 24 fascinating colour images onto walls and ceilings in a dark children's room. Nature, space, fairytale world – the versatile themes provide hours of entertainment. Brainstorm Projector Torches include three slide discs with 24 pictures. Swap and change the slides easily by pulling back the plastic flap. Insert the chosen disc and rotate the disc round to project clear colour images up to one meter wide – a great bedtime companion to make going to sleep more fun. Projector Torch can also be used as a normal torch without the slides in place. With ON/OFF switch and including batteries (3 x AG13/LR44). On blistercard.

► S'CUBE Labyrinth Cube

S'Cube is a 3-dimensional ball labyrinth - find the exit for the 3 balls! Free the 3 balls from the labyrinth by rotating the cube. The exit (round hole with larger diameter) is marked with a circle. Then lead the balls back through the maze to their starting positions, marked with rectangular bars. S'CUBE trains different abilities: memory, three-dimensional thinking, dexterity, patience and concentration. Different items and colours available with graduated levels of difficulty. Made in Serbia.

S'Cube Labyrinth Puzzle

Construct your own labyrinth cubes from the individual parts. The maze puzzle allows 1152 different combinations. Contains interior parts in 2 colours: The blue interior parts are simpler, the white interior parts are more demanding. Size of the labyrinth puzzle: 76 x 76 x 76 mm (6 inner parts per colour: 72 x 72 x 72 mm). Packaging size: H128 x W254 x T86 mm. Age: 8+

Giiker Super Cube i3SE

GiKER Super Cube i3SE – the smart 3D-Puzzle!

The Giiker Super Cube i3SE (successor of the SUPER CUBE i3s) combines the classic Cube with modern Bluetooth-technology:

- Connect the smart and interactive Cube to a Smartphone or Tablet via Bluetooth and enjoy a new world of possibilities: Sync technology detects the real-time motion data and transmit it to the Super Cube Smartphone App (Android 4.4 or higher / iOS 8.0 or higher)
- Automatically detects the real-time status of each side of the Cube, calculates the fastest path and guides in real time, records time, steps, speed and the solution accurately and helps you to improve your skills or allows for fun games
- Community and Competition: Network with other players – play live against players from all over the world
- Mini Games: Play cool mobile games on the go
- Changes from the predecessor model: Longer battery run-time, now with smartphone holder, revised packaging will boost your sales
- Material: ABS
- Size: 56.5 x 56.5 x 56.5 mm
- Incl. 3,7V lithium battery – charging time approx. 1 hour
- More than 90 hour gaming fun on one charge
- Age: 6+
- Package includes: Super Cube i3SE, charger, Micro USB charging cable, smartphone holder, instruction manual

► INSIDE³ -

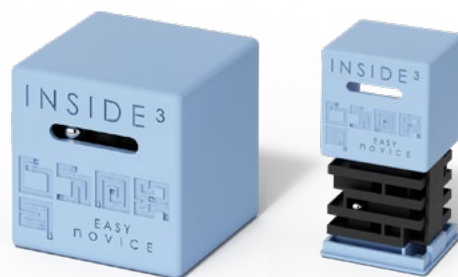

The Ultimate Labyrinth Cube

- INSIDE³ is a three-dimensional maze which is played blindly in a cube
- Guide the ball blindly through the labyrinth of the cube, which consists of several levels, according to the engraved plans and then bring it back to the starting point
- Most cubes can be opened when players got stuck
- A range of 13 different levels of difficulty is available
- The INSIDE³ assortment consists of 3 series:
 - **NoVICE series:** small cube with 5 easily accessible levels
 - **Zero (0) series:** 7-level cube - from easy to very difficult
 - **Phantom series:** the cube with 7 complex levels including a second ball
- The colour of the cube defines the degree of difficulty:
 - **Blue (Easy)** - ideal for beginners - cubes can be opened
 - **Green (Regular)** - average level of difficulty - cubes can be opened
 - **Orange (Mean)** - high level of difficulty - cubes can be opened
 - **Red/Pink (Awful)** - the cube with traps and dead ends ... horribly difficult - cubes can be opened
 - **Brown (Vicious)** - construction of the cube is similar to red, but the cubes cannot be opened
 - **Black (Mortal)** - construction of the cube is similar to red, but the cubes cannot be opened and do not provide any maps
- Made in France

► Wisdom Ball – enhance logic, patience and concentration

The Wisdom Ball is a number slide puzzle and a real challenge for any 3D puzzler. The Wisdom Ball surprises with its unique gameplay:

- Each of six rotating discs has slots to hold eight numbers from 1 to 8 (except the purple disc with 7 numbers and one empty slot)
- In the solved position, each disc has the numbers of its colour in counterclockwise numerical order
- 3 Wisdom Balls with different levels of difficulty – from easy to extreme
- Mix the numbers and colours and return to the solution

► Airglider

With wings made of extra strong rip-stop fabric and a fiberglass and carbon composite frame, our gliders are robust and more durable than conventional models. With their graceful lines and delicate aerobatic manoeuvres these gliders offer a feast for the eyes while they soar through the sky. Our Airglider offers the flyer many alternatives to experiment with the flight experience. You are encouraged to add or subtract ballast and adjust the wings to alter the flight characteristics.

Airglider 40

Start with: Handstart, rubber band catapult (incl.).
Wingspan: 40 cm, Length: 45 cm, Sail: Ripstop-Polyester,
Fuselage: Carbon, Age: 6+
